Patient information:

Your care provider has recommended you visit Origin Health, Center for OB/GYN and Maternal Fetal Care. We welcome you. We hope that you will find your visit to be helpful.

For your convenience, we are located in the right in the same clinic as your Great Falls OB/GYN Associates health providers.

Origin Health, LLC is a group of healthcare professionals who work with your primary women's healthcare provider to provide you advanced women's imaging and Maternal Fetal Medicine ultrasound performance, interpretation, and care consultation. When you have your visit, you will meet with our team who will review your medical history and your current health and, in most cases, perform an ultrasound evaluation. The ultrasound will typically be performed by one of our sonographers who is an expert in women's health ultrasound examinations. After the ultrasound is performed the images will be reviewed in detail by your OB/GYN or REI physician or by an Origin Health, Maternal Fetal Medicine (MFM) physician. If there are any concerns identified the MFM physician or your provider will review these with you in a timely fashion and discuss the implications and management options/recommendations. In some situations, you will meet with the MFM physician directly for counseling or real time ultrasound evaluation or via video means. We strive to accomplish this in a respectful, truthful, kind, and nurturing manner. You can learn more about us on our website www.originhealth.com.

What is a Maternal-Fetal Medicine (MFM) physician?

A Maternal-Fetal Medicine specialist (Perinatologist) is a trained obstetrician/gynecologist who has 3 years of additional formal training (fellowship) and specialized interest and experience taking care of women with complicated pregnancies. MFM physicians are experts at performing and interpreting ultrasound examinations.

Guidelines

- Please bring a picture ID, insurance card; insurance referral forms if needed.
- Please arrive 10 minutes early for check-in and completion of any additional paperwork.
- If you are more than 15 minutes late, your appointment may be delayed or rescheduled. If you need to cancel, reschedule, or anticipate being late, call our office as soon as possible so that we can accommodate you.
- There is no need for you to have a full bladder at the time of your visit but drinking plenty of water prior to your visit will be helpful.
- Please prepare for a possible delay in your appointment time; We do our best to run the schedule in a timely fashion but some unforeseen situations with other patients can prolong your wait time.
